DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-15 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Objections

3. Claims 2, 3, 6, 7 and 9 are objected to because of the following informalities: the dependency should address to the earlier claim itself only, not to the part of the earlier claim as – the method of 1c, 1b – as stated. Appropriate correction is required.

Claim Rejections - 35 USC 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

*A person shall be entitled to a patent unless --
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.*

Art Unit: 2618

5. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Heinonen et al. (U.S. Patent No. 7,107,010 B2).

Regarding claim 1, Heinonen teaches a method of adding an extension phone, i.e., a headset, to a wireless telephone comprising means of interfacing the wireless telephone device with one or more extension phone, i.e., the headset; allowing the wireless device and the extension to be aware of what is happening to the other; and to initiate activity within the wireless device or within the extension phone (refer to Figs. 1-2 and col. 3/lines10-50).

The rest of claims 2-10 simply refer to the communication between the headset and the wireless telephone and the interaction between the two for dialing, receiving incoming calls, and/or ending incoming calls and the detection to answer the phone call from the extension unit or the headset (col. 6/line 21 to col. 7/line 55; and Fig. 2 and col. 7/line 57 to col. 8/line 58).

Regarding claims 11-15, these claims are rejected for the reasons as disclosed above, which mainly refer to the communication between the headset regarded as an extension unit and the wireless telephone device.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Bodley, Tehrani, zirul, and Shostak (in PTO 892 attached) disclose systems related to wireless communication with headsets.

Art Unit: 2618
